

Marsha M. Linehan

Founder of Dialectical Behaviour Therapy (DBT)

Training Workshops: March 2016
Melbourne, Brisbane, Sydney

Development & Application of DBT: Practical Strategies for Practical Therapists

Dialectical Behaviour Therapy (DBT) is a comprehensive, modular-based intervention for complex and difficult-to-treat disorders including self-harming, suicide, drug and alcohol abuse, eating disorders and unstable relationships.

These two-day training workshops are designed to review DBT strategies and to examine typical pitfalls in delivering these strategies across various clinical populations. They will cover areas where even those well-versed in the practice may find difficulty.

This is a wonderful and unique opportunity. Places at these workshops with this remarkable woman are limited, early booking is recommended.

Together we help build a life worth living.
